CYBERPUNK

RT4110 CYBERPUNK V3

Back out to the Edge: the new edition of CYBERPUNK jumps the world ahead twenty (?) years from the events of Stormfront and Shockwave. Where will your characters be in the Post-Information Age? SEE INSIDE FOR PREVIEW

RT04021 NIGHT CITY 203X

NIGHT CITY has become a smear of nanotech-built chaos from X to X, but it's still the Casablanca of the Cyberpunk Age. Everyone comes to Night City. What better place to start your campaign. A detailed city setting that will create perfect flavor for your game or update you on old friends.

RT04031 CORPORE METAL/CITY OF STEEL

With common culture the linking point of community in V3, the metal bodies found a new home where they are neither feared nor controlled. With the right dogtag, you can visit the enclave where being a cyborg is the norm. We consider their history, new tech, society, and alliances.

RT04041 CHROME #5/TREASURE HUNT

With communications systems impaired and separate enclaves jealously guarding their technologies, much less any question of currencies, how to get things is now as important as what's out there. New goodies, apocryphal old tech, barter, connections and tomb raiders

FUZION

FZ10010 CORE FUZION
